The railroad has been laid, and the great British Columbia is about to be opened up to trade. The cities and towns are growing, and the inhabitants are building new homes and extending their businesses. The population is increasing, and the future of the province is secure.

"There is a great deal of activity in the north. The gold rush has been opened, and the country is being settled. The Hudson's Bay Company is expanding its operations, and the Canadian Pacific Railway is being built. The government is doing much to encourage trade and industry, and the people are working hard to establish a good foundation for the future. The province is rich in natural resources, and the possibilities are great. The future of British Columbia is assured, and the people are looking forward to a bright and prosperous future.
